

# Turn passive viewing into active learning

With ClickView Interactive Videos

ClickView Interactive Videos enable teachers to create active learning experiences by adding built-in questions or problems, which encourages students to engage more deeply with the video. Students consider what they are viewing, check they have understood, and reflect on key learnings.

 **Encourage students to critically reflect on the content**

Extended response questions draw upon the students' skills to reflect, apply wise judgement, and solve new problems.

 **Built-in analytic tools provide insight into student progress**

Receive detailed reporting within ClickView for measurable results of video viewing and concept comprehension.

 **Target your teaching to boost student outcomes**

Educators can use this data to formatively assess their students and differentiate their teaching more effectively.
