Art

Stills from our new title

World Art

With the help of Norman and his friend, this series introduces the characteristics, history and cultural context of art from different parts of world.

Japanese Art

From emakimono to manga, ukiyo-e to shodo, yamato-e to origami – the world of Japanese art is steeped in history, and it continues to amaze today. Our animated friend Norman steers an entertaining ride through the characteristics, history and cultural context of the main traditional forms of Japanese art, including some of the more unusual ones, and finishes with a look at art in modern Japan.

Biology

Stills from our new series

Heredity

This series investigates the cellular systems and processes involved in transmitting genetic material to new cells and offspring.

DNA and Inheritance

DNA, genes and chromosomes are the structures containing the genetic material of humans. Find out about these structures, what happens to them during meiosis, and how genetic material is inherited. This clip contains diagrams of the DNA molecule and processes such as cell division and the use of Punnett Squares to predict offspring ratios.

Mitosis and Meiosis

Cells are found in the tissues of all kinds of different organisms but how are new cells created? This clip describes the cell cycle and two types of cell division: mitosis, which is important for growth and repair; and meiosis, the process of generating sex cells for sexual reproduction. Diagrams and graphics demonstrate what is happening inside dividing cells.

History

Stills from our new series

The Vikings

This engaging series explores essential Viking information in a memorable and fun way which is sure to appeal to history students.

Viking Life

When Mikey catches his neighbour practicing for an upcoming film role as a Viking, he unexpectedly learns a whole lot about the real Vikings—and perhaps that his neighbour is taking his research just a little bit too far! This lighthearted and entertaining look at the Vikings is packed with fascinating information about the daily life of Vikings including home life, work, leisure, laws and society.

Viking Expansion

While practicing for his upcoming acting role as a Viking, “Erik” gets a little carried away and ropes his neighbour Mikey into joining him on a modern day exploration mission, with a little bit of looting on this side! This lively and enjoyable look at the Vikings is packed with fascinating information about Viking expansion, and how they were able to be such successful raiders, traders and explorers.

Erik the Red: Viking Legend

When a modern day Viking finds himself in police custody, being questioned over some bizarre recent activities, he tells the officer an almost unbelievable story—that of famous Viking, Erik the Red. Can his fantastic tale really be true, or is this a case of one actor taking his upcoming Viking role too seriously? This is a fun and look at Erik the Red's significant contribution to Viking expansion and settlement.

Music

Stills from our new title

Music of the World

This series introduces the characteristic rhythms, instruments and styles of music from different parts of world.

Introducing the Music of Japan

Whether it's the unique sounds of a Koto, Shamisen, Shaku, or Shinobue, or the pounding of traditional drums, Japanese music has evolved over centuries as an integral part of the nation's rich culture.

Featuring Shaku performer Adam Simmons, Koto performer Brandon Lee and Japanese drummer Toshi Sakamoto, this video explores the history of Japanese music, its structures and a range of traditional instruments.

Religion

Stills from our new series

Religion in Contemporary Society

This series examines what religion means in today's society and looks at some of the new religious movements that have evolved. We discuss if contemporary society is moving away from the traditional and historical view of religion or if religion and spirituality are merely changing and taking on new forms.

What Is Religion?

What is religion? Religion means different things to different people. This programme looks at the different ways that social scientists examine religions, with a focus on the substantive and functional approaches to religion.
